ARIA AI • ASSESSMENT ACTIVE

AI/ML Engineer Intern - Task — Identify an AI Opportunity for Cynbit

Technical task assigned for your AI/ML Engineer Intern application. Please complete and submit before Sat, Oct 31, 04:40 PM.

APPLICANT / LEAD

Amit

Hi Amit, I'm Aria from the Cynbit Talent Acquisition team.

A new practical technical assessment (AI/ML Engineer Intern - Task — Identify an AI Opportunity for Cynbit) has been assigned for your AI/ML Engineer Intern application. Please review the instructions below and submit your work before Sat, Oct 31, 04:40 PM.

CHALLENGE OVERVIEW

Analyze Cynbit's website, services, and publicly available information.
Identify opportunities where AI/ML could improve Cynbit's business, internal

processes, customer experience, or future products. Choose one opportunity and demonstrate how you would approach it.

REQUIRED DELIVERABLES

- AI Opportunity Report: Industry analysis detailing high-value AI/ML opportunities for Cynbit.
- AI/ML Proof of Concept: Functional demo or code prototype (Colab notebook, Python script, Streamlit app, or API).
- Technical Approach Report: Document covering model choices, data pipeline, prompt engineering/architecture, and execution plan.

ROLE	DEADLINE	SUBMIT PORTAL
AI/ML Engineer Intern	Sat, Oct 31, 04:40 PM	Online Link

Assessment Instructions & Submission Flow

1

1. Review & Build Solution

Review technical requirements, build your solution, and commit clean code with git history.

2

2. Deploy & Publish

Publish your repository to GitHub (or live demo) and ensure it is publicly accessible.

3

3. Submit Work Link

Open your dedicated submission portal link: Submit Your Work

Ready to submit?

Submit your repository URL and technical setup notes on your candidate portal.
